

Physiolution GmbH is an innovative company specializing in the investigation of the dissolution of solid oral dosage forms under biorelevant test conditions. To support our team we are looking for

a scientific researcher in full-time,
initially for a limited period of 1 year (with an option of extension)

Your tasks:

- Independent planning, preparation, implementation and evaluation of laboratory tests
- Development and validation of analytical methods (UV Vis, HPLC, possibly GC)
- Independent documentation of test planning and test results, incl. reporting
- Collaboration in the conceptualization and implementation of research projects
- Collaboration in the development and evaluation of new test devices and test liquids

Your profile:

- PhD in pharmacy or biochemistry
- Extensive (min. three years) laboratory experience in methods of instrumental analytics
- High technical understanding
- Independent, flexible and reliable working style
- Analytical and critical way of working
- Confident handling of MS Office
- Good command of written and spoken English, further foreign language skills may be an advantage

Our offer:

- Work in an international small company
- 30 days of paid leave
- Opportunities for further training
- Interesting tasks with challenging possibilities

Please send **Applications** with the usual documents only via e-mail (one pdf-file) quoting the job advertisement number (maLa/012022)

until 30.10.2021 to:

info@physiolution.eu
